England.

Dearest Martha,

I have
just finished I write to you.
But as I could not explain
all I would like to I guess
I better write this letter.

You were saying something
about the people writing
me to you folks about
not studying. So I thought
that if you do not write
to me so much it would
give you a little more
time to study. I know how
hard it is to get interested in
the dry old books when
you could be out with
the boy friend.

I will try to get give you ²
a good example.

You see once there was
a boy who thought that
it would be good to
be an officer + good to
school college, well he got
in to meteorological.
So after telling every body
that his high school had
picked him + two other boys
to take the army course because
their grade was good. He
went in to the army with
with high hopes of being
an officer. After a month
at Fort and then to school.
The school was Washington
V. Well he met a great
bunch of boys. Guess the

best he will ever know. 3.
It was good for the first
10 or 12 weeks but it was
to hard any way that is what
he told every body. I was
hard alright but he could
of study more. Any way he
took the easy way but by
not studying playing ball
& jokes on the boys and writing
to much. He use to write
in all the class that he sat
in the back of the room.
Will to make a short story
long. He left N.V. because
of his grades. He stayed
at S.B. for a while and
then over seas. Now if he
would of studied he would
be in his own home town now.

3.
of course I mean a lot
of people - done a lot of
thing. But when it goes
right down to it. The
studying would've been better
in the long run. I met some
girl that lived in Kirkman
Mo. Well after a couple of
date. The books went to
the back. But after I left
W.V. I never ~~heard~~ her
again. 2 months later she
got married. So all the time
I could've been studying
I did not. And look where it
got me. No place!! of course
I did start going but with
a name my way she told
me that she was trying to
be a nurse.

and that is the best part of
of the last year.

I hope that will explain
it to you better. You once
said that you would
like & the only thing that interests
you was the P.M. in back
of your name. I am still
waiting to see that. And
I pray that will happen.

I know how hard it
is to explain things to you
dad & mother. I was hard
very in fact very hard for
me to explain.

I better close now because
I have to do some work.

With lots of love & kisses

W. J.

That next letter better not come
from Indianapolis.
